

Python Loops Question Bank

Q1. Prime Number

Write a Python program to accept a number from the user and check whether the given number is a **Prime Number** or not.

Q2. Fibonacci Series

Write a Python program to accept the number of terms from the user and display the **Fibonacci Series** using a loop.

Q3. Armstrong Number

Write a Python program to accept a number from the user and check whether the given number is an **Armstrong Number** or not.

Q4. Reverse a Number

Write a Python program to accept a number from the user and display its **reverse** using a `while` loop.

Q5. Palindrome Number

Write a Python program to accept a number from the user and check whether the given number is a **Palindrome Number** or not.

Q6. Factorial of a Number

Write a Python program to accept a number from the user and calculate its **factorial** using a `for` loop.

Q7. Prime Numbers in a Range

Write a Python program to display all **Prime Numbers between 1 and 100** using nested loops.

Q8. Greatest Common Divisor (GCD)

Write a Python program to accept two numbers from the user and find their **Greatest Common Divisor (GCD)** using a loop.

Q9. Number Pattern

Write a Python program to display the following number pattern using **nested loops**:

```
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
```

Q10. Number Guessing Game

Write a Python program to create a **Number Guessing Game**. Store a secret number in the program and allow the user to repeatedly enter guesses until the correct number is guessed.

Display appropriate messages such as:

- **Try a higher number**
- **Try a lower number**
- **Correct Guess!**
